

**Managed environment with access to a digital ecosystem.  
Connect, manage and operate your global distributed edge installations.**

## Edge in a Box is scaled to suit size and performance requirements

### Small

#### IPC BX-21A

North/South connectivity applications for gathering and sending data from a single or small number of machines.

### Medium

#### IPC BX-39A

Connectivity and Data Visualization and manipulations applications for EDGE deployment for several machines.

### Large

#### IPC BX-59A

Connectivity, Data Visualization and manipulation and high demand applications for EDGE deployment for several machines.

## Getting Started with Production Optimization Benefits

- Designed to be built upon with specialized extension packages for tailored solutions
- Quick Setup tool deploys in as little as 60 minutes
- Easy OT-network integration – Connect to a single PLC
- Instant transparency – Monitor efficiency, production changes, and receive mobile notifications
- Automated reporting – Track key KPIs like production quality & throughput
- Cost Effective & Flexible – Ensures financial flexibility and scalability
- Agile & Modular Software – Connects to existing systems with minimal need for IT involvement
