OUTDOOR

Versatile, durable outdoor signage

Our outdoor LED solutions provide robust, weather-resistant performance with vibrant brightness and superior visibility, designed to withstand harsh environments. These dynamic signage options enable impactful brand messaging and seamless integration into diverse outdoor settings, ensuring maximum engagement and durability.

POPULAR

Series V

Most advanced, durable, and versatile outdoor display

- Lightweight
- Superior color accuracy
- Energy efficient
- Heat, rain, and snow-proof
- Easy to install

Usurface III

Ultra-slim, high-brightness outdoor display

- Reduced sunlight reflection
- IP65 rated for harsh outdoor climates
- Slim, lightweight aluminum cabinet
- Up to 10,000 NITs of brightness

Usign

Purpose-built outdoor digital billboard

- Modular for custom billboard sizes and shapes
- Extreme weather protection
- Crisp image quality at far distances
- Smart monitoring of display status

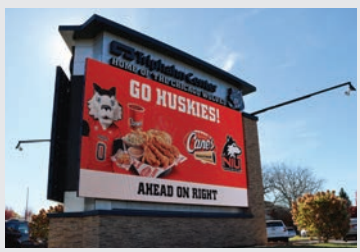

USK

Extreme-weather outdoor display with IP69K protection

- Energy-saving DVPS technology
- IP69K die-cast aluminum to handle harsh coastal and salt-spray environments
- High 7680 Hz refresh rate for smooth, crisp motion
- Curving and corner-capable designs

RENTAL

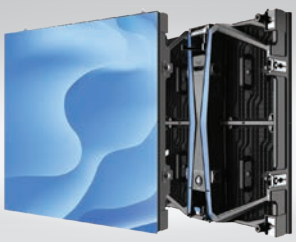

Customizable solutions for A/V applications

Electro-Matic and Unilumin are collaborating to provide LED display solutions to Audio Visual businesses operating in the rental space. Our premium LED displays provide AV companies with a flexible, high-demand asset that can be rented repeatedly for a wide range of events.

These displays bring significant value to your organization by acting as a consistent revenue stream without the need for clients to invest in permanent installations. From concerts and trade shows to corporate meetings and retail activations, our LED displays are the solution that your customers are looking for.

Upad IV

Lightweight indoor-only high resolution displays
